

New York Stock Market

New York, February 21.—Most of the favored issues on the Stock Exchange were heavy to-day, although there were no evidences of extensive bear pressure or liquidation. Traders were eager to buy securities of the Gould roads that they gave little attention to the remainder of the list, and dropped through neglect. Liquidations of recent accumulation of the Gould securities by strong interests attracted the large following, and when the market opened the buying of these stocks and the bonds which sent them up sharply toward the close of yesterday's session was resumed. The market is gaining ground that the movement is in connection with a broad plan which probably will not be consummated for some time. The day's business was conducted largely in the morning in which dealings in Gould securities ran into the afternoon. The market was a whole lot better, and although there was some improvement in the afternoon, the market was not so active. The market was not so active in the afternoon, and trading was at low ebb. In the final hour the market became more active at lower prices, and the close was heavy, with slight losses in the usually active stocks.

There was relatively more activity in bonds than in stocks. Transactions in the first two hours were greater than the total for several recent days, but reflecting an investing of investment demands, since the bulk of the dealing was in the Gould issues. The market was not so active in the afternoon, and trading was at low ebb. In the final hour the market became more active at lower prices, and the close was heavy, with slight losses in the usually active stocks.

The only change in the money market was the placing of one cent on a 4 per cent. Total interest and dividend disbursements for March are estimated at \$115,000,000, which compares with \$105,000,000 for February and \$107,000,000 for March of last year. The increase over last year is largely due to the increase in dividends. The market for bonds was stronger in the afternoon, with the strength in the Gould movement. Total sales to-day were, par value, \$2,500,000. Total sales of stocks, \$2,500,000.

New York, February 21.—Money on call steady.
